Release

These combined release notes apply to the released versions of firmware for the Spectralink 72x2-Series. This version specifically applies to version PCS 16B of the firmware. The release is a main release that replaces the PCS 15Q release as the latest generally available (GA) release.

The current handset firmware PCS information can be found in Menu/Status/General information under Firmware. The version consists of two digits and two letters. The digits and first letter forms the major version. The last letter, which can be either small or capital, is the minor version.

Minor versions are irrelevant for these release notes and are therefore left out.

Driver for the Handset Management Cradle.

Ensure that the latest driver is installed. You can download it here>>
